PROFESSIONAL SUMMARY

Computer Science graduate with a 3.97 GPA and practical experience developing web applications through internships and academic projects. Work includes Django business systems, React interfaces, REST APIs, and relational databases, with team collaboration using GitHub, Jira, and Notion.

TECHNICAL SKILLS

Languages: Python, PHP, JavaScript, HTML, CSS

Frameworks: Django, Django REST Framework, React, Laravel

Databases: PostgreSQL, MySQL, SQLite

Tools and concepts: Git, GitHub, Jira, Notion, REST APIs, OOP, MVC, database design

EXPERIENCE

Backend Development Intern | TechTalks | Remote Aug - Oct 2026

- Collaborated with a seven-member team on Ordira, a Django platform for small online clothing shops.
- Structured Django applications, configured environment variables and PostgreSQL settings, and contributed to database modeling and ERD design.
- Used GitHub branches and pull requests, Jira tasks, and Notion documentation to coordinate development.

Operations & Technical Intern | EVA Ops | Remote May - Jun 2026

- Developed a Recruitment CRM with Django and role-based dashboards for administrators, companies, and candidates.
- Implemented job and application management, interview scheduling, notifications, and authentication features.

SELECTED PROJECTS

Ordira | Django, PostgreSQL 2026

- Team platform combining public shop catalogs and guest checkout with inventory, order, customer, and manual payment management.
- Contributed to project structure, environment configuration, and relational database planning.

TaskFlow | Django REST Framework, React, PostgreSQL 2026

- Built a full-stack task manager with REST APIs, JWT authentication, task CRUD, and a React interface.

Mini ERP Factory Management System | Laravel, MySQL 2026

- Built a factory management system covering employees, attendance, production, payroll, and role-based access.
